

METODI SIMEONOV

I have over 10 years of experience in the IT Services industry with background in large cross-cultural projects in multiple domains. I have had the opportunity to lead projects in traditional and sequential, ITIL framework and as of recently, I have been involved in delivering Agile MVPs with quick turnaround time.

Currently, I am looking for opportunities that allows me to build tools with R and Python leveraging a combination of visualization, machine learning, and data engineering to help customers explore and understand their data in new and meaningful ways.

EDUCATION

2020
|
2016

- **B.S., Psychology and Cognitive Science**
New Bulgarian University  Sofia, BG
 - Thesis: Big Five personality dimensions and job satisfaction as predictors of Burnout
 - Developed regression model in R for evaluating and testing hypotheses.
 - Highlighted Coursework: Statistics, Statistical Data Analysis, Experimental Psychology, Cognitive Modeling.

2009
|
2006

- **B.S., Marketing**
MTM College Sofia  Sofia, BG
 - Highlighted Coursework: Statistics, Higher Maths, Finance, Data Analysis, Marketing Research.

INDUSTRY EXPERIENCE

Current
|
2020

- **Data Science & Analytics Consultant**
Hitachi Solutions Europe  Sofia, BG
 - Working as a full stack data scientist on variety of projects primarily in the field of forecasting and classification modeling. Building up a pan-European DevOps practice driving the expansion of data science portfolio. Using jupyter notebooks to upskill team members with practical ML projects.
 - Using Shiny and Dash to integrate R and Python into containerized predictive web applications deployed to the Azure cloud. Using Azure DevOps for backlog and version (Git) control. Using Docker for application isolation and deployment.
 - Participating in data migration and modernization projects with Azure Data Factory, Synapse, SQL and Power BI integration.

● Business Intelligence Developer

Hewlett Packard Enterprise

📍 Sofia, BG

- Developed end-to-end machine learning algorithm written in R to forecast demand for one of HPE's GreenLake strategic deals. Used combination of Kwiatkowski-Phillips-Schmidt-Shin (KPSS) and augmented Dickey-Fuller (ADF) tests to evaluate hypotheses and determine stationarity of the time series. Output of the algorithm include standard accuracy metrics such as RMSE, MAPE, MASE and MAE.
- Participated in the development of real-time streaming analytics solution for monitoring of Salesforce cases, orders, and escalations. Used Azure SQL DB to store live data feed from Kafka consumer, connected with direct query to a Power BI dashboard presenting instant view of the data.
- Developed Salesforce connector with R for on demand extraction of objects and fields using complex SOQL queries and API calls (REST & BULK) wrapped in functions, thus automating traditional salesforce reporting and data extraction for large volumes of data (+30 million rows).
- Collaborated with the business to maintain and update critical company tools, ensuring the proper use of KPIs and metrics. Updated and automated SQL Views and SSIS packages used for data loads of millions or records.

2020
|
2018

● Business Analyst

DXC Technology

📍 Sofia, BG

- Analyzed organizational and business domain specific processes and systems, assessed the business model and its integration with technology within the boundary of Workplace and Mobility of Offering Delivery & Transformation.
- Developed Power BI dashboards to monitor headcount attrition and turnover, employee distribution, skillset, and active project assignments.
- Worked with global L5 management team to drive business decisions, leveraging data from Salesforce, SAP Business Objects, and other internal systems.

2018
|
2016

● Solution Consultant

Hewlett Packard Enterprise

📍 Sofia, BG

- Identified and validated opportunities to accelerate consumption in high potential customer accounts. Drove solution architecture in partnership with the delivery teams. Enabled the customer to envision their environment and services, while leveraging the greater DXC and partner resources (internal teams and partners).
- Provided technology leadership for development of Future Mode of Operation solution designs and functional migration plans. Closely cooperated with Account Teams, Subject Matter Experts, Chief Engineers, Operations, Delivery and Clients.
- Worked with financial data during pre-sales. Created cost models and revenue plans.

CERTIFICATES

2021	● DS4B 201-R: Data Science For Business With R Business Science University	📍 Sofia, BG
2021	● DS4B 203-R: High Performance Time Series Forecasting Business Science University	📍 Sofia, BG
2021	● DS4B 102-R: Web Applications with R-Shiny Business Science University	📍 Sofia, BG
2021	● DP-900: Microsoft Azure Data Fundamentals Microsoft	📍 Sofia, BG
2021	● AZ-900: Azure Fundamentals Microsoft	📍 Sofia, BG
2021	● DS4B 101-R: R for business analysis Business Science University	📍 Sofia, BG
2020	● Distributed Computing with Spark SQL Coursera	📍 Sofia, BG
2020	● Data Wrangling, Analysis and AB Testing with SQL Coursera	📍 Sofia, BG
2020	● Advanced R Programming Coursera	📍 Sofia, BG
2020	● Building Interactive Apps With Shiny and R Udemy	📍 Sofia, BG
2020	● Programming with R Coursera	📍 Sofia, BG
2020	● Qlik Sense Data Architect Masterclass Udemy	📍 Sofia, BG
2019	● MCSA: Machine Learning Microsoft	📍 Sofia, BG
2019	● 773: Analyzing Big Data with Microsoft R Microsoft	📍 Sofia, BG
2019	● 774: Perform Cloud Data Science with Azure Machine Learning Microsoft	📍 Sofia, BG

2019	<ul style="list-style-type: none"> ● SQL for Data Science Coursera 	📍 Sofia, BG
2019	<ul style="list-style-type: none"> ● Implementing a Data Warehouse with Microsoft SQL Server Udemy 	📍 Sofia, BG
2019	<ul style="list-style-type: none"> ● Perform ETL using SSIS Udemy 	📍 Sofia, BG

TOOLS AND TECHNOLOGIES

- R Studio / Visual Studio Code / Spyder (Anaconda)
- Power BI / DAX Studio / Tabular Editor
- Docker
- SSMS, SSIS

COMPETENCIES

- Friendly, collaborative and open-minded
- Able to translate business requirements to technical deliverables
- Autonomous, adaptable, flexible and resilient
- Creative with lateral thinking
- Strong interpersonal skills
- Able to communicate effectively at all levels
- Can do attitude

WORK REWARDS / RECOGNITIONS

- 2021 ● Received exceed expectations during my first 6 months at Hitachi Solutions
- 2018 ● Manager-to-Employee Program: Innovators at Heart
- 2017 ● Manager-to-Employee Program: Bias for Action
- 2016 ● Recognition for successful transition of portfolio services from large UK telecom to HPE in 2016

PROJECT PORTFOLIO

- 2021 ● Equity Trading Forecast Analysis 📍 Sofia, BG
 - Worked on a POC consultancy project for a FinTech company where I developed a forecasting solution in R for predicting equity trading volumes. Used variety of nested and ensembled models to process multiple time series in parallel.
 - Blueprints of the solution without the code can be demoded here:
 - <https://rpubs.com/MetodiSimeonov/Superlearner>
 - <https://rpubs.com/MetodiSimeonov/Nested>
 - <https://rpubs.com/MetodiSimeonov/Results>
- 2021 ● Employee Attrition Analysis 📍 Sofia, BG
 - Developed predictive analysis in R to target employee attrition. Used variety of tree based and ensemble models in H2O, embedded as a notebook in Azure Machine Learning.
 - Created custom set of metrics for exec level stakeholders targeting model interpretability and explainability with the help of the LIME library.
 - Developed KPIs based on results to address the prevention and reduction of employee turnover.
 - Sample of the analysis can be viewed here: <https://rpubs.com/MetodiSimeonov/Attrition>
- 2021 ● Marketing Mixed Modeling with Robyn 📍 Sofia, BG
 - Used the R open-source Robyn package developed by Facebook to model marketing allocation and spending strategy for optimizing ROI.

2021	<ul style="list-style-type: none"> ● Credit Score Prediction 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny web app to assess the default risk (probability) using TabNet in Pytorch and XGBoost to compare results and performance. • Link to the web app - • https://metodisimeonov.shinyapps.io/Loan_Credit_Score/ 	
2021	<ul style="list-style-type: none"> ● Customer Lifetime Value Web App 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny CLV web app using data from now defunct music store. • Link to the web app - • https://metodisimeonov.shinyapps.io/Customer_Lifetime_Value/ 	
2021	<ul style="list-style-type: none"> ● Nestted Forecaster Web App 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny Product Forecasting App for the M5 Forecasting Accuracy challenge on Kaggle using XGBoost, Prophet and Random Forest models. • Link to the web app - • https://metodisimeonov.shinyapps.io/Nested_Forecaster/ 	
2021	<ul style="list-style-type: none"> ● Hierarchical Forecaster Web App 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny Product Exploration App for the M5 Forecasting Accuracy challenge on Kaggle using an ensemble approach comprising of XGBoost and Lightgbm models. • Link to the web app - • https://metodisimeonov.shinyapps.io/Hierarchical_Forecaster/ 	
2021	<ul style="list-style-type: none"> ● Customer Explorer Web App 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny web app that aggregates customer purchasing behavior into a convenient tool. • Link to the web app - • https://metodisimeonov.shinyapps.io/Customer_Explorer/ 	
2021	<ul style="list-style-type: none"> ● Predictive Web Apps with R-Shiny 	<ul style="list-style-type: none"> 📍 Sofia, BG
	<ul style="list-style-type: none"> • Developed R-Shiny web apps for scalable deployments leveraging embedded machine learning for price prediction and revenue forecasting. • Link to the web app - • Forecasting App using XGBoost - https://metodisimeonov.shinyapps.io/sales_dashboard_forecast_app/ • Price Prediction App using XGBoost - https://metodisimeonov.shinyapps.io/price_prediction_app/ 	

- 2021 ● **Time Series Forecasting**  Sofia, BG
- Created complex functions to automate the processing of nested and hierarchical forecasting time series datasets.
 - Sample plot can be viewed here - <https://rpubs.com/MetodiSimeonov/NestedTSPlot>
- 2021 ● **A/B Testing Analysis**  Sofia, BG
- Developed A/B Testing algorithm with R aiming to design experiment framework that is robust and provides repeatable results.
 - The results of the analysis can be viewed here - <https://rpubs.com/MetodiSimeonov/ABTest>
- 2021 ● **Interactive Customer Segmentation in a 2D Projection**  Sofia, BG
- The data in this analysis comes from the S&P 500 Index. Using a method of UMAP 2D projection with K-Means cluster assignment of Customer-Item matrix to classify companies based on how their stocks trade using their daily stock returns (percentage movement from one day to the next). This analysis can help to determine which companies are similar to each other in various segments of the market.
 - The results of the analysis can be viewed here - <https://rpubs.com/MetodiSimeonov/Clustering>
- 2021 ● **Customer Segmentation**  Sofia, BG
- Developed customer segmentation algorithm with R to showcase purchasing preferences of a customer-base with heat map visualization and UMAP 2D projection with K-Means cluster assignment of customer-item matrix.
 - The results of the analysis can be viewed here - <https://rpubs.com/MetodiSimeonov/CustomerSegmentation>
- 2021 ● **Product Pricing Algorithm**  Sofia, BG
- Based on the regression analysis I determined the best performing model and developed Product Pricing Algorithm using XGBOOST to predict the price of 2 new items in existing product gap.
 - The model output can be viewed here - <https://rpubs.com/MetodiSimeonov/ProductPricingAlgorithm>
- 2021 ● **Regression Algorithm**  Sofia, BG
- Developed pricing algorithm with R to determine a new product price in a category gap. Evaluating five different models to determine the price - lm, glmnet, decision tree, random forest and xgboost.
 - The model output can be viewed here - <https://rpubs.com/MetodiSimeonov/Regression>

- 2021 ● **COVID-19 Dashboard**  Sofia, BG
- This dashboard is built with R using the R Markdown and flexdashboard framework and was adapted from the dashboard of Rami Krispin, courtesy of Antoine Soetewey. The input data for this dashboard is the dataset available from the {coronavirus} R package. The raw data is pulled from the Johns Hopkins University Center for Systems Science and Engineering (JHU CCSE) Coronavirus repository.
 - The dashboard can be viewed as a Shiny web application here - <https://metodisimeonov.shinyapps.io/COVID-19-Bulgaria-v2/>, or as a static HTML here - <https://rpubs.com/MetodiSimeonov/COVID-19-Bulgaria>
- 2020 ● **Principal Component Analysis (PCA) in R**  Sofia, BG
- Used PCA to extract insights from public dataset.
 - Created data visualization plot using plotly that explains clustering segments within the data.
 - Visualization can be viewed here - <https://rpubs.com/MetodiSimeonov/PCA>
- 2020 ● **Image Processing with Computer Vision**  Sofia, BG
- Used a combination of computer vision neural networks (RVision & OpenCV) for image pre-processing: sharpening, color inversal and deskewing.
 - Used Google's Tesseract engine for post-processing: text extraction and translation.
- 2019 ● **Sentiment Analysis of Twitter Data**  Sofia, BG
- Developed R script to source tweets in a SQLite DB for sentiment analysis with the Syuzhet package.
 - Results, plots and code are available on my GitHub.
 - Graphical results can be viewed here - <https://rpubs.com/MetodiSimeonov/NLP>
- 2019 ● **Hotel Recommendation Engine**  Sofia, BG
- As part of a regional upskilling program I have created and deployed scalable solution using data from 300k reviews for 1478 hotels across Europe.
 - Used combination of R and Azure Machine Learning for data cleansing, feature engineering, model creation and deployment.
