# METODI SIMEONOV

I have over 10 years of experience in the IT Services industry with background in large cross-cultural projects in multiple domains. I have had the opportunity to lead projects in traditional and sequential, ITIL framework and as of recently, I have been involved in delivering Agile MVPs with quick turnaround time.

Currently, I am looking for opportunities that allows me to build tools leveraging a combination of visualization, machine learning, and data engineering with R to help customers explore and understand their data in new and meaningful ways.

## EDUCATION

–
|
2021

### M.S., Data Science and Machine Learning

New Bulgarian University — Sofia, BG

- Starting October 2021

2020
|
2016

### B.S., Psychology and Cognitive Science

New Bulgarian University — Sofia, BG

- Thesis: Burnout and job satisfaction: A comparative analysis using the Big Five personality dimensions.
- Developed a regression model in R for evaluating and testing hypothesis. Thesis defense due April, 2021.
- Highlighted Coursework: Statistics, Statistical Data Analysis, Experimental Psychology, Cognitive Modeling.

2009
|
2006

### B.S., Marketing

MTM College Sofia — Sofia, BG

- Highlighted Coursework: Statistics, Higher Maths, Finance, Data Analysis, Marketing Research.

## LANGUAGE SKILLS

- R
- SQL
- DAX
- Python

*Made with the R package* ***pagedown***

*The source code is available on* *github.com/Met0o/Resume*

*Last updated on 2021-02-12*

## INDUSTRY EXPERIENCE

Current | 2020

### Data Science & Analytics Consultant

Hitachi Solutions Europe — Sofia, BG

- Working on the integration of an automated data extraction and modeling algorithm for processing data sets in Azure Data Factory.
- The algorithm is written in R and can train and score multiple forecasting models in parallel, thus highlighting the best performers.
- On top of the forecasting feature, another key component of the algorithm is the integration of Bayesian Adaptive Regression Tree model for identifying key predictors and features in a given dataset.
- Generated output consist of different accuracy metrics such as RMSE, MAE, and others presented in tabular form, interactive plotly chart with point forecast predicted values, confidence intervals variance and side by side comparison of the models.
- Time Series Forecasting Plot can be viewed here - https://rpubs.com/MetodiSimeonov/TSPlot

2020 | 2020

### Business Intelligence Developer

Hewlett Packard Enterprise — Sofia, BG

- Developed Power BI dashboard with embedded Machine Learning algorithm written in R to forecast numerical demand for one of HPE's GreenLake strategic deals. The algorithm is fully automated and trained daily on non-random 80% sample of the data while the remaining 20% are used for its testing. Outputs of the algorithm include the forecasted values for the next 30 days, a graph with point forecast, confidence intervals variance and standard accuracy metrics such as RMSE, MAPE, MASE and MAE to estimate the error percent.
- Participated in the development of a real-time stream analytics solution for monitoring of Salesforce cases, orders, and escalations, using Azure SQL DB storing live data feed from Kafka consumer written in C# that is connected with direct query to a Power BI dashboard presenting instant view of the data feed.
- Developed Salesforce connector with R for on demand extraction of objects and fields using complex SOQL queries and API calls (REST & BULK) wrapped in functions, thus automating traditional salesforce reporting and data extraction for large volumes of data (+30 million rows).
- Developed Hive connector with R that allowed team members to leverage an automated ETL solution for processing of flat dimension objects within Hive using HiveQL in R functions.
- Collaborated with the business to maintain and update critical company tools, ensuring the proper use of KPIs and metrics. Updated and automated SQL Views and SSIS packages used for data loads of millions or records.

2020 | 2018

### Business Analyst

DXC Technology

Sofia, BG

- Analyzed organizational and business domain specific processes and systems, assessed the business model and its integration with technology within the boundary of Workplace and Mobility of Offering Delivery & Transformation.
- Developed Power BI dashboards to monitor headcount attrition and turnover, employee distribution, skillset, and active project assignments.
- Worked with global L5 management team to drive business decisions, leveraging data from Salesforce, SAP Business Objects, and other internal systems.

2018 | 2016

### Solution Consultant

Hewlett Packard Enterprise

Sofia, BG

- Identified and validated opportunities to accelerate consumption in high potential customer accounts. Drove solution architecture in partnership with the delivery teams. Enabled the customer to envision their environment and services, while leveraging the greater DXC and partner resources (internal teams and partners).
- Provided technology leadership for development of Future Mode of Operation solution designs and functional migration plans. Closely cooperated with Account Teams, Subject Matter Experts, Chief Engineers, Operations, Delivery and Clients.
- Worked with financial data during pre-sales. Created cost models and revenue plans.

2016 | 2014

### Application Packaging SME

Hewlett Packard Enterprise

Sofia, BG

- Developed customized processes to meet business objectives, leveraging the industry best practices and HPE standards. Defined phases, workflows, handover between service providers and interaction between them.
- Worked with project teams to create flight and project plans. Identified and estimated risks. Processed design and setup for non-standard solutions.
- Developed customized packaging and application virtualization standards leveraging industry best practices and HPE standards.
- Evaluated existing procedures and processes and participated in continuous improvement initiatives.
- Evaluated alternatives for deploying and supporting applications in managed environments.

2014 | 2012

### Application Packager

Hewlett-Packard — Sofia, BG

- Applied Application Packaging subject matter knowledge to solve complex business cases.
- Used consulting skills including questioning, listening, ideas development, permission and rapport and subject matter influencing to accomplish project tasks.
- Interacted with clients and account teams from the discovery phase to implementation phase of application packaging and scripting requests.
- Assisted the client to establish their success criteria, requirements definitions, anticipated risks, establishing test cases and validation of assumptions.

2012 | 2012

### Remote Support Engineer

Unicredit Bulbank — Sofia, BG

- Provided 2nd level technical support to the Bank employees.
- Monitored AD and DHCP servers.
- Remotely installed and configured applications using sysinternals, vb and cmd scripting.
- Restored user data and domain profiles.

2012 | 2011

### Remote Support Engineer

Adecco Bulgaria — Sofia, BG

- Provided 2nd line technical support over phone and remote access.
- Installed software with CMD to end user machines without direct user interference.
- Worked with System Internals to change the registry and services, analyzed crash dump files using windbg.
- Monitored AD and SQL server logs for profile and domain account issues.

2011 | 2010

### AVG Technical Support Engineer

60K Ltd. — Sofia, BG

- Solved technical issues of end-users over email/phone or remote sessions.
- Removed novel threats such as rootkits and adware.
- Configured the AVG antivirus solutions on client workstations.

## CERTIFICATES

2021

### AZ-900: Azure Fundamentals

Microsoft — Sofia, BG

2021

### DS4B 101-R: R FOR BUSINESS ANALYSIS

Business Science University — Sofia, BG

2020

### Distributed Computing with Spark SQL

Coursera — Sofia, BG

2020 **Data Wrangling, Analysis and AB Testing with SQL**
Coursera — Sofia, BG

2020 **Advanced R Programming**
Coursera — Sofia, BG

2020 **Building Interactive Apps With Shiny and R**
Udemy — Sofia, BG

2020 **Programming with R**
Coursera — Sofia, BG

2020 **Qlik Sense Data Architect Masterclass**
Udemy — Sofia, BG

2019 **MCSA: Machine Learning**
Microsoft — Sofia, BG

2019 **773: Analyzing Big Data with Microsoft R**
Microsoft — Sofia, BG

2019 **774: Perform Cloud Data Science with Azure Machine Learning**
Microsoft — Sofia, BG

2019 **SQL for Data Science**
Coursera — Sofia, BG

2019 **Implementing a Data Warehouse with Microsoft SQL Server**
Udemy — Sofia, BG

2019 **Perform ETL using SSIS**
Udemy — Sofia, BG

## TOOLS AND TECHNOLOGIES

- R Studio / Visual Studio / Spyder (Anaconda)
- Power BI Desktop / DAX Studio
- SSMS, SSIS
- SQL Server 2016/2014
- Powershell / Power Automate
- Vertika
- Apache Kafka

## COMPETENCIES

- Able to translate business requirements to technical deliverables
- Autonomous, adaptable, flexible and resilient
- Creative with lateral thinking
- Strong interpersonal skills
- Able to communicate effectively at all levels
- Can do attitude

## WORK REWARDS / RECOGNITIONS

2018 - Manager-to-Employee Program: Innovators at Heart

2017 - Manager-to-Employee Program: Bias for Action

2016 - Recognition for successful transition of portfolio services from large UK telecom to HPE in 2016

## PROJECTS OUTSIDE OF WORK

2021 **A/B Testing Analysis**

Sofia, BG

- Developed A/B Testing algorithm with R aiming to design experiment framework that is robust and gives repeatable results.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/ABTest

2021 **Interactive Customer Segmentation in a 2D Projection**

Sofia, BG

- The data in this analysis comes from the S&P 500 Index. Using a method of UMAP 2D projection with K-Means cluster assignment of Customer-Item matrix to classify companies based on how their stocks trade using their daily stock returns (percentage movement from one day to the next). This analysis can help to determine which companies are similar to each other in various segments of the market.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/Clustering

2021

### Customer Segmentation

Sofia, BG

- Developed customer segmentation algorithm with R to showcase purchasing preferences of a customer-base with heat map visualization and UMAP 2D projection with K-Means cluster assignment of customer-item matrix.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/CustomerSegmentation

2021

### Product Pricing Algorithm

Sofia, BG

- Based on the regression analysis I determined the best performing model and developed Product Pricing Algorithm using XGBOOST to predict the price of 2 new items in existing product gap.
- The model output can be viewed here - https://rpubs.com/MetodiSimeonov/ProductPricingAlgorithm

2021

### Regression Algorithm

Sofia, BG

- Developed pricing algorithm with R to determine a new product price in a category gap. Evaluating five different models to determine the price - lm, glmnet, decision tree, random forest and xgboost.
- The model output can be viewed here - https://rpubs.com/MetodiSimeonov/Regression

2021

### COVID-19 Dashboard

Sofia, BG

- Created COVID-19 dashboard with R using the R Markdown and flexdashboard framework.
- The dashboard can be viewed here - https://rpubs.com/MetodiSimeonov/COVID-19-Bulgaria

2020

### Principal Component Analysis (PCA) in R

Sofia, BG

- Used PCA in to extract insights from public dataset.
- Created plotly based data visualization plot that explains clustering segments within the data.
- Visualization can be viewed here - https://rpubs.com/MetodiSimeonov/PCA

2020

### Image Processing with Computer Vision

Sofia, BG

- Used a combination of computer vision neural networks (RVision & OpenCV) for image pre-processing: sharpening, color inversal and deskewing.
- Used Google's Tesseract engine for post-processing: text extraction and translation.

2019

### Sentiment Analysis of Twitter Data

Sofia, BG

- Building a data pipe with R, storing the tweets in SQL and performing sentiment analysis with R.
- Results, plots and code are available on my GitHub.
- Graphical results can be viewed here - https://rpubs.com/MetodiSimeonov/NLP.

2019

### Hotel Recommendation Engine

Sofia, BG

- Creating and deploying scalable solution using data from 300k reviews for 1478 hotels across Europe.
- Using a combination of R and Azure Machine Learning for data cleansing, feature engineering, model creation and deployment.
- Engine description and underlying code are available on my GitHub.
