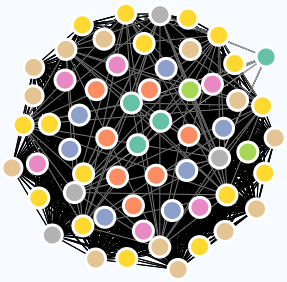
METODI SIMEONOV

I have over 10 years of experience in the IT Services industry with background in large cross-cultural projects in multiple domains. I have had the opportunity to lead projects in traditional and sequential, ITIL framework and as of recently, I have been involved in delivering Agile MVPs with quick turnaround time.

Currently, I am looking for opportunities that allows me to build tools with R leveraging a combination of visualization, machine learning, and data engineering to help customers explore and understand their data in new and meaningful ways.



EDUCATION

2023 | 2021

M.S., Data Science and Machine Learning

New Bulgarian University — Sofia, BG

- Starting October 2021

2020 | 2016

B.S., Psychology and Cognitive Science

New Bulgarian University — Sofia, BG

- Thesis: Big Five personality dimensions and job satisfaction as predictors of Burnout
- Developed regression model in R for evaluating and testing hypotheses.
- Highlighted Coursework: Statistics, Statistical Data Analysis, Experimental Psychology, Cognitive Modeling.

2009 | 2006

B.S., Marketing

MTM College Sofia — Sofia, BG

- Highlighted Coursework: Statistics, Higher Maths, Finance, Data Analysis, Marketing Research.

INDUSTRY EXPERIENCE

Current | 2020

Data Science & Analytics Consultant

Hitachi Solutions Europe — Sofia, BG

- Organized people into small pan-European DevOps practice, focusing on the expansion of portfolio offerings with data science products and solutions.
- Integrating R and Python code in containerized predictive web applications deployed to the Azure cloud. Using Azure DevOps for backlog and version (Git) control. Using Docker for application isolation and deployment.
- Participating in large scale data migration projects using Azure Modern Data Platform orchestration. SQL design and deployment with Power BI integration.
- Supporting customers post go live phases, performing change requests and suggesting improvements and upgrades.

LANGUAGE SKILLS

- R
- SQL
- Python

Made with the R package pagedown.

The source code is available on github.com/Met0o/cv.

Last updated on 2021-06-29.

2020 | 2020

Business Intelligence Developer

Hewlett Packard Enterprise

Sofia, BG

- Developed end-to-end solution written in R with automated Machine Learning algorithm to forecast numerical demand for one of HPE's GreenLake strategic deals. Used combination of Kwiatkowski–Phillips–Schmidt–Shin (KPSS) and augmented Dickey–Fuller (ADF) tests to evaluate hypotheses and determine the stationarity of the time series. Output of the algorithm include the forecasted values, confidence intervals variance and standard accuracy metrics such as RMSE, MAPE, MASE and MAE to estimate the error percent.
- Participated in the development of real-time stream analytics solution for monitoring of Salesforce cases, orders, and escalations. Used Azure SQL DB to store live data feed from Kafka consumer written in C#, connected with direct query to a Power BI dashboard presenting instant view of the data.
- Developed Salesforce connector with R for on demand extraction of objects and fields using complex SOQL queries and API calls (REST & BULK) wrapped in functions, thus automating traditional salesforce reporting and data extraction for large volumes of data (+30 million rows).
- Developed Hive connector with R that allowed team members to leverage an automated ETL solution for processing of flat dimension objects within Hive using HiveQL in R functions.
- Collaborated with the business to maintain and update critical company tools, ensuring the proper use of KPIs and metrics. Updated and automated SQL Views and SSIS packages used for data loads of millions or records.

2020 | 2018

Business Analyst

DXC Technology

Sofia, BG

- Analyzed organizational and business domain specific processes and systems, assessed the business model and its integration with technology within the boundary of Workplace and Mobility of Offering Delivery & Transformation.
- Developed Power BI dashboards to monitor headcount attrition and turnover, employee distribution, skillset, and active project assignments.
- Worked with global L5 management team to drive business decisions, leveraging data from Salesforce, SAP Business Objects, and other internal systems.

2018 | 2016

Solution Consultant

Hewlett Packard Enterprise

Sofia, BG

- Identified and validated opportunities to accelerate consumption in high potential customer accounts. Drove solution architecture in partnership with the delivery teams. Enabled the customer to envision their environment and services, while leveraging the greater DXC and partner resources (internal teams and partners).
- Provided technology leadership for development of Future Mode of Operation solution designs and functional migration plans. Closely cooperated with Account Teams, Subject Matter Experts, Chief Engineers, Operations, Delivery and Clients.
- Worked with financial data during pre-sales. Created cost models and revenue plans.

CERTIFICATES

2021 **DS4B 102-R: Web Applications with R-Shiny**
Business Science University
Sofia, BG

2021 **DP-900: Microsoft Azure Data Fundamentals**
Microsoft
Sofia, BG

2021 **AZ-900: Azure Fundamentals**
Microsoft
Sofia, BG

2021 **DS4B 101-R: R for business analysis**
Business Science University
Sofia, BG

2020 **Distributed Computing with Spark SQL**
Coursera
Sofia, BG

2020 **Data Wrangling, Analysis and AB Testing with SQL**
Coursera
Sofia, BG

2020 **Advanced R Programming**
Coursera
Sofia, BG

2020 **Building Interactive Apps With Shiny and R**
Udemy
Sofia, BG

2020 **Programming with R**
Coursera
Sofia, BG

2020 **Qlik Sense Data Architect Masterclass**
Udemy
Sofia, BG

2019 **MCSA: Machine Learning**
Microsoft
Sofia, BG

2019 **773: Analyzing Big Data with Microsoft R**
Microsoft
Sofia, BG

2019 **774: Perform Cloud Data Science with Azure Machine Learning**
Microsoft
Sofia, BG

2019 **SQL for Data Science**
Coursera
Sofia, BG

2019 **Implementing a Data Warehouse with Microsoft SQL Server**
Udemy
Sofia, BG

2019

- **Perform ETL using SSIS**
  Udemy
  Sofia, BG

TOOLS AND TECHNOLOGIES

- R Studio / Visual Studio Code / Spyder (Anaconda)
- Power BI / DAX Studio / Tabular Editor
- Docker
- SSMS, SSIS
- Apache Kafka
- Apache Hive

COMPETENCIES

- Friendly, collaborative and open-minded
- Able to translate business requirements to technical deliverables
- Autonomous, adaptable, flexible and resilient
- Creative with lateral thinking
- Strong interpersonal skills
- Able to communicate effectively at all levels
- Can do attitude

WORK REWARDS / RECOGNITIONS

2021 **Received exceed expectations during my first 6 months at Hitachi Solutions**

2018 **Manager-to-Employee Program: Innovators at Heart**

2017 **Manager-to-Employee Program: Bias for Action**

2016 **Recognition for successful transition of portfolio services from large UK telecom to HPE in 2016**

PROJECT PORTFOLIO

2021 **Churn Analysis**

Sofia, BG

- Developed rmarkdown notebook analysis for predicting customer churn in a telecom company. Used variety of linear and tree based models and standard metrics to evaluate and compare model performance.
- The notebook of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/Churn_Analysis

2021 **Predictive Web Apps with R-Shiny**

Sofia, BG

- Developed R-Shiny web applications for scalable deployments leveraging embedded machine learning for price prediction and revenue forecasting.
- Lightweight demo versions of the web apps with dummy data can be accessed from my shinyaps.io profile.
- Forecasting App using XGBoost - https://metodisimeonov.shinyapps.io/sales_dashboard_forecast_app/
- Price Prediction App using XGBoost - https://metodisimeonov.shinyapps.io/price_prediction_app/

2021 **Time Series Forecasting**

Sofia, BG

- Developed Time Series interactive plot using R and Plotly to demonstrate how calibrating a model to a testing set maps with test predictions and residuals. Calibration depicts how confidence intervals and accuracy metrics are determined. Forecasting predictions and residuals are calculated from out-of-sample data.
- The forecasting plot can be viewed here - https://rpubs.com/MetodiSimeonov/TSPlot

2021

A/B Testing Analysis

Sofia, BG

- Developed A/B Testing algorithm with R aiming to design experiment framework that is robust and provides repeatable results.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/ABTest

2021

Interactive Customer Segmentation in a 2D Projection

Sofia, BG

- The data in this analysis comes from the S&P 500 Index. Using a method of UMAP 2D projection with K-Means cluster assignment of Customer-Item matrix to classify companies based on how their stocks trade using their daily stock returns (percentage movement from one day to the next). This analysis can help to determine which companies are similar to each other in various segments of the market.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/Clustering

2021

Customer Segmentation

Sofia, BG

- Developed customer segmentation algorithm with R to showcase purchasing preferences of a customer-base with heat map visualization and UMAP 2D projection with K-Means cluster assignment of customer-item matrix.
- The results of the analysis can be viewed here - https://rpubs.com/MetodiSimeonov/CustomerSegmentation

2021

Product Pricing Algorithm

Sofia, BG

- Based on the regression analysis I determined the best performing model and developed Product Pricing Algorithm using XGBOOST to predict the price of 2 new items in existing product gap.
- The model output can be viewed here - https://rpubs.com/MetodiSimeonov/ProductPricingAlgorithm

2021

Regression Algorithm

Sofia, BG

- Developed pricing algorithm with R to determine a new product price in a category gap. Evaluating five different models to determine the price - lm, glmnet, decision tree, random forest and xgboost.
- The model output can be viewed here - https://rpubs.com/MetodiSimeonov/Regression

2021

COVID-19 Dashboard

Sofia, BG

- This dashboard is built with R using the R Makrdown and flexdashboard framework and was adapted from the dashboard of Rami Krispin, courtesy of Antoine Soetewey. The input data for this dashboard is the dataset available from the {coronavirus} R package. The raw data is pulled from the Johns Hopkins University Center for Systems Science and Engineering (JHU CCSE) Coronavirus repository.
- The dashboard can be viewed here - https://rpubs.com/MetodiSimeonov/COVID-19-Bulgaria

2020

Principal Component Analysis (PCA) in R

Sofia, BG

- Used PCA to extract insights from public dataset.
- Created data visualization plot using plotly that explains clustering segments within the data.
- Visualization can be viewed here - https://rpubs.com/MetodiSimeonov/PCA

2020

Image Processing with Computer Vision

Sofia, BG

- Used a combination of computer vision neural networks (RVision & OpenCV) for image pre-processing: sharpening, color inversal and deskewing.
- Used Google's Tesseract engine for post-processing: text extraction and translation.

2019

Sentiment Analysis of Twitter Data

Sofia, BG

- Developed data pipe with R to extract and store tweets in a SQLite DB used for sentiment analysis performed with the Syuzhet R package.
- Results, plots and code are available on my GitHub.
- Graphical results can be viewed here - https://rpubs.com/MetodiSimeonov/NLP

2019

Hotel Recommendation Engine

Sofia, BG

- As part of a regional upskilling program I have created and deployed scalable solution using data from 300k reviews for 1478 hotels across Europe.
- Used combination of R and Azure Machine Learning for data cleansing, feature engineering, model creation and deployment.
